Portfolio

Profile

Optimized a React-based movie rating application, reduced loadtime by 27%. Improved interaction readiness by 8%, reducing Largest Contentful Paint by 39% through code splitting, lazy loading and asset optimization. Reduced unneccessary API requests by 32%. Reduced initial JavaScript bundle size by 22% resulting in faster page reloads on slower network connections. Optimized a React and Node.js Based Music Player web application where load time is reduced by 25% of initial load time. Reduced response time by 90% from 2s to 100ms.

SKILLS

- **HTML**, HTML5, **CSS**, CSS3, Tailwind CSS, SCSS
- **JavaScript/TypeScript** (ES6+, Function, Hoisting, Prototypes and Inheritance, OOP(Object Oriented Programming), Functional Programming, Arrow Function, Destructuring, Spread and Rest Operators, Modules, Async/Await, Promises) **Data Structures** (Array and Array Methods, Objects, Sets and Maps, JSON Handling)
- **DOM and Browser APIs** (DOM Manipulation, Event Handling, Browser APIs, Local Storage and Session Storage
- **Backend** :- **Node.js** (Express.js, Middleware, RESTful API development, Rate Limiting, Authentication and Authorization using JWT, CRUD Operations, Error Handling, Dotenv, Cors, brcypt, Passport, Strategy), Docker, Drizzle ORMs, Custom docker builds.
- **Frontend** :- **React.js** and **Next.js** (Props and State Management, ReactHooks(useState, useEffect, useRef, useContext), Custom React Hooks, Component Lifecycle, Conditional Rendering, React-Router, Event Handling, Context API, API Integration, Reusable Component Development, Performance Optimization),
- **Databases** :- MongoDB, MySQL, PostgreSQL, Data Modeling, SQL queries, Database Design, Indexing, Aggregation Framework, Joining databases
- **Tools and Technologies** :- NPM, Postman, VS Code, **Git**, Github, PGAdmin4, MongoDB Atlas, Vite, ESLint, React and Vue Developer Tools, Render, Vercel, Code SandBox, LeetCode

Other Skills:-

- **Python** Pandas, Flask, Django, Web Scrapping with Beautifulsoup and Selenium, automation, List and Dictionary and their comprehensions, Numpy,
- **Linux** Command Line, Package Management, System administration, Developement environment setup.

EXPERIENCE

Music Player :-

- A music player with the playlist created on the Youtube Music.
- Node.js for the backend. React.js for the UI.
- Optimized for all screen sizes. Displays the live viewers.
- Reduced the delay in playing next song by 90% which is decreased from 2s to 200ms.
- Final output is 15 times faster than the orginal.
- The server side code is on GitHub is Server Link and the client side on the GitHub is Client UI Link .
- The link to the live demo is Live Demo.

Use Popcorn :-

- Contains the list of movies rated by the user along with the rating on the IMDB.
- Used the useState, useEffect and useRef to update the values in the real time.
- Used the Custom Hooks and the reusable components with the React Library.
- The API used is OIMDB to fetch the movie when user searches the name of the movie. Also displays the name of directors, actors, etc from the fetched data.
- Stored the user data to the browser using the cookies and local storage which store user data for 24 hours.
- The complete code is available on the Github. Link :- Link For usePopcorn
  This website is hosted on Vercel. To see the live preview go to Live Demo

Todo List with MERN :-

- It is about creating a Todo list where user can create, update, delete and read the previous todo list items.
- Store that data items and the changes to the database.
- Used the Node.js for the backend. Authentication and Authorization using the JWT so that every user has its own unique list of todos.
- Express.js as the middleware along with Cors.
- Async/Await for the promises in asynchronous tasks for the CRUD Operations.
- RESTful API to connect with the database and frontend.
- Used the React.js for the frontend with the use React Hooks such as useState, useRef and useEffects. Also used custom hooks for the project.
- Added the light and dark mode too with website being super interactive.
- The code for the project is GitHub Project Link

Amazon website clone :-

- This project is built only with JavaScript as the backend and HTML, CSS as the forntend.
- Created multiple pages along with navbar and adding items to the cart.
- Used DOM to interact and update the cart with every change.
- Used the Jasmine Test to test the for possible scenarios in the project which started with a normal to advanced tests.
- The webpage is hosted on vercel :- Live Demo Link

Lisper Project:-

- A Node.js project where any one can write and read secrets anonymously.
- Used the ejs (embedded JavaScript) files to create the project.
- The code is available on Github at https://github.com/rahul-t0mar/secret-project
- The final render of this project is available on Render at https://secret-project-051c.onrender.com/

Awesome Star Rating :-

- A simple and customizable React star rating component.
- You can use it for rating movies, products, reviews, or anything that needs a star rating UI.
- Highly customizable with color of star, number of star, size of stars, etc
- npm install awesome-star-rating
- import StarRating from "awesome-star-rating";

EDUCATION

B.Sc. in Physics, Chemistry and Mathematics 2014-2017
Digamber Jain College

M.A. in Mathematics 2019-2021
Himalayan Garhwal University

High School (ICSE Board) Baraut, Uttar Pradesh
Christu Jyothi Convent Sr. Sec. School

Intermediate (ISC Board) Baraut, Uttar Pradesh
Christu Jyothi Convent Sr. Sec. School

Courses

The Complete Full Stack Web Developement Bootcamp 2024
Udemy- Online

The Ultimate React Course 2024
Udemy - Online

The Complete Nodejs Course 2023
Udemy - Online

The Complete Nodejs Course Advance 2024
Udemy - Online

The Complete Python Bootcamp 2024
Udemy - Online

Strenghts

- **90% reduction time in website response**, from 2s to 100ms, delivering approximately **15x faster performance**.
- **Improved interaction readines by 8%** and **Contentful Paint by 38%** by code splitting and **reduced JavaScript bundle size by 22%** resulting in faster reload time.
- **Strong full-stack development** skills with **JavaScript/TypeScript, React.js, Next.js and Node.js** along with extensive experience in SQL and non-SQL databases such as **MySQL, PostgreSQL, Mongo DB, Drizzle ORM.**
- Skilled in **Docker and Linux** for developement, containerization and development workflows.

HOBBIES

- Blogging
- Music
- Internet Surfing
- Travelling
- Video Gaming
- Listening Podcast
- Reading Books
- Video Editing
